Final Term – Long Quiz 1 – Reader Response

The article presented by UNICEF explains cyberbullying, its nature, risks, and ways people seek help. It explains how harmful remarks, comments, and messages appear on social media, in games, and in other online areas that everyone utilizes on a daily basis. The main idea focuses on cyberbullying as a severe problem that exists in the digital world and impacts anyone, anytime, on the internet. You see how online actions create real harm in school, home, and social spaces. The article shows how victims experience emotional pain, stress, and fear, and how support systems such as reporting tools and trusted adults play a role in response. I learned how cyberbullying spreads through everyday platforms such as social media sites like Facebook and Twitter and how it has both immediate and long-term effects on one's physical, mental, and emotional well-being.

The picture shows a school computer placed on a desk with a chair and cables connected. The setup shows a normal learning space where students use technology

for work and communication. The image connects to the article's message about cyberbullying existing in everyday digital environments used by everyone. The computer represents the platform where harmful messages and online harassment occur. The empty chair reflects how victims feel alone after negative online experiences. The connected cables show how online spaces stay active and present in daily life. The photo shows the theme of cyberbullying, showing concern and awareness about how technology, while useful for many reasons, also exposes people to risks discussed in the article.
