GED0001

NAME: _____ SECTION: _____
TEXT TITLE: _____ DATE: _____
TEXT TYPE: _____ AUTHOR: _____

I. PRE-READING (10 POINTS)

A. Complete the table with the headings, subheadings, and visual titles/descriptions from the text. Provide at least 2 entries for each column.

Headings	Subheadings	Title/Description of Visuals
- INTRODUCTION - Measurement of Trust in and Reliance on ChatGPT - RESULTS - DISCUSSION - CONCLUSION	- Related Work - Current Studies - Importance of Student Perceptions in Education	TABLE I STUDENTS' EXPERIENCE WITH CHATGPT BEFORE THE ASSIGNMENT Fig. 1. Students' perceptions of ChatGPT in assignment, context of learning, and trustworthiness prior to completing the assignment (blue) and (red) relative to a midline (dotted line). Error bars represent ± 1 SEM. Fig. 3. Grading preferences (frequency) and mean trust ratings by an agent. Error bars represent ± 1 SEM.

B. Fill the table with information that you already know about the topic (K), you wonder about the topic (W), and you will learn after reading the text (L). Fill the L Column after reading the text. Provide at least 2 entries for each column.

K	W	L
- The concept of AI - ChatGPT - Education	- How it affects students and teachers. - How will it affect the landscape of education.	How Generative AI affects the education of students and teachers alike.

II. READING (30 POINTS)

READING PROCESS WORKSHEET

GED0001

NAME: _____ SECTION: _____
 TEXT TITLE: _____ DATE: _____
 TEXT TYPE: _____ AUTHOR: _____

- A. Fill the table with specific details from the text and inferences that can be drawn from it. Provide at least 2 entries for each column.

Details from the Text	Plausible Inferences
Student perceptions play a vital role in shaping their motivation, engagement, and academic achievement [14], [16]. Positive perceptions of the learning experience can enhance students' engagement and motivation, leading to improved academic outcomes. Conversely, negative perceptions can result in disengagement, reduced motivation, and hindered academic success.	- How student views AI will influence how much effort they do in their work - How students feel about AI in class will likely influence their academic results.
Additionally, the lack of full confidence in the accuracy and reliability of ChatGPT's output likely contributed to students' discomfort after the assignment.	- Students did not fully trust the accuracy of ChatGPT's responses - Doubt made them feel unsure while doing the assignment. - The uncertainty made students modify their work.

- B. Figure out the meaning of the technical term from the text. Write the technical term, indicate the clue from the text, and use the term in your own sentence. Provide at least 2 entries for each column.

Technical Term	Context Clue (i.e., antonym, synonym, examples, description, word parts, definition or any clues in the text)	Use each technical term in a sentence
1. Artificial Intelligence tools	ChatGPT AI Assistive Tools	Artificial intelligence tools are software application that uses complex algorithms, machine learning, and natural language to perform automated tasks.
2. LLMs	Language models ChatGPT Automated Writing Evaluation	Language Learning Models or LLMs are a type of artificial intelligence that is trained on massive data's to understand and use human language.
3. Student Perception	Positive and negative perceptions Responses Perceive	The past school event did not work out based on student's perception.

TEXT TYPE: _____ AUTHOR: _____

4. Automated writing evaluation	AWE Low-level writing	Only one professor in the entire faculty uses Automated Writing evaluation.
5. Writing	Novel Literature	The professor gave us a writing assignment about artificial intelligence.

C. Supply the missing information below:

1. Topic of the text:
The Downside of Generative AI like ChatGPT on education of students.
2. Writer's opinion about the text's topic:

The writers sees AI tools like ChatGPT as useful in college essays, but they also warns about the risks. They argue that students should use AI to support their writing, not replace their own thinking. AI helps with ideas and structure, but it also create problems for grading and trust in between one another.

3. Support for writer's opinion (e.g., evidence such as facts, testimonies, examples, etc.):
 - A. In early 2023, a survey of over 1000 undergraduate and graduate students revealed one in five Students had used ChatGPT on their assignments and essays
 - B. Elsewhere, over 50% of students reported that they were tempted to cheat using ChatGPT
 - C. As reported by Sullivan et al., roughly 33% of 1000 students surveyed used ChatGPT for their writing and, out of those students, 75% acknowledged it as cheating. Others are more optimistic that the use of AI will change education and essay writing for the better.

III. POST-READING (10 POINTS)

A. Answer the following rhetorical analysis guide questions.

What credentials does the author have which give him/her the authority to write about the topic of the text?

The authors have authority because they specialize in their respective fields in AI, deepfakes, and writing.

1. After considering the author's profession and affiliation, what possible biases the author might have about the topic?

READING PROCESS WORKSHEET

GED0001

NAME: _____ SECTION: _____
TEXT TITLE: _____ DATE: _____
TEXT TYPE: _____ AUTHOR: _____

The authors may show bias based on their background in AI and writing. They could downplay student concerns to present AI in a more favorable way, or take a critical stance and focus too much on its risks.

2. What is the purpose of the text, and how does the author accomplish that purpose?
What evidence does the author use to support the main idea in the text?

The texts goal is to examine how students and teachers view and use AI tools like ChatGPT in their studies. The authors reach this goal by gathering student responses and analyzing both opinions and patterns in their use.

3. What specific idea/information in the text challenges or surprises you? Why?

One idea that surprised me is the finding that ChatGPT did not make the assignment easier, but changed it in ways that supported learning. I expected students to rely on it to reduce effort, yet many saw it as a collaborative tool after using it.

4. Is the style of writing suitable for the intended audience? Is it too formal or too casual?
Why

The style fits its audience, that audience being teachers, students, and AI developers. The writers use clear and balanced language, hence the text feels professional but still casual enough for anyone in the related field to understand it. It is not too formal or too casual, which makes it easy to follow for different readers.
